Caterpillar Emissions Solutions Selects CleanAIR Systems, Inc. as the Preferred Vendor of Stationary Retrofit Aftertreatment Systems

16 May 2008

Caterpillar Emissions Solutions is delighted to announce an allied vendor agreement with CleanAIR Systems Inc. of Santa Fe, New Mexico, to produce and distribute retrofit aftertreatment products for the commercial engine market. This agreement enhances CleanAIR's ability to provide emissions control devices for Caterpillar's large, stationary engines typically found in electric power and industrial engine applications.

CleanAIR Systems is a privately owned company in Santa Fe, New Mexico. Started in 1993, they are a leader in retrofit aftertreatment solutions with a strong customer focus. They have innovative and proprietary technology, and flexible manufacturing enabling a high-degree of customization. Their broad product portfolio ranges from CARB-verified particulate filters (DPF), oxidation catalysts, Selective Catalytic Reduction Systems (SCR), to innovative hybrid DPF-SCR Silencers – all available at competitive prices. Already many CAT Dealers have worked with CleanAIR and had very positive experiences.

Under our agreement, Caterpillar Dealers can work directly with CleanAIR Systems to meet their customer's emission control requirements. Dealers should contact CleanAIR for products, pricing, and delivery times. CleanAIR will design, manufacture, and ship the system to the dealer or customer site for installation. Information regarding CleanAIR Systems, their products, markets, and product support capabilities is available on an exciting new Web Portal exclusively designed for CAT Dealers. (Please check the attached FAQ sheet for web access and login directions.)

Caterpillar Emissions Solutions' new role will be to provide marketing and engineering support to CleanAIR Systems, assist with CARB and EPA Verification, and jointly develop next-generation products unique to our Caterpillar customer.

This announcement will be followed by several "webinars" to explain our relationship with CleanAIR. Three Regional Launch Events are scheduled throughout the summer, where CleanAIR representatives will discuss their product portfolio, engineering and manufacturing capabilities, and their market approach. Your regional Caterpillar Emissions Solutions Territory Manager is available to provide you with additional information. I also encourage you to visit CleanAIR's outstanding website at www.cleanairsys.com.

We look forward to working closely with each of you in this exciting initiative.

Frequently Asked Questions - CleanAIR Systems Agreement

? **What is the relationship with CleanAIR Systems?**

As a formal part of an Allied Vendor Agreement (AVA), Caterpillar has chosen CleanAIR Systems to be the "Preferred Vendor of Stationary Aftertreatment Systems".

? **What is the purpose of the AVA with CleanAIR?**

The purpose of the AVA is to provide CAT dealers and customers access to a broader range of stationary aftertreatment products, including diesel particulate filters, oxidation catalysts, three-way catalysts, and SCR-based NOx reduction systems.

? **What applications are affected?**

The current agreement is limited to retrofit exhaust gas aftertreatment systems installed on stationary engines, such as those in electric power or other industrial applications.

? **Who is CleanAIR Systems?**

CleanAIR Systems, a privately owned company established in 1993, works within the retrofit market to supply custom aftertreatment systems for diesel and natural gas engines. Vertical integration in engineering, manufacturing, controls development, and engine testing provides CleanAIR Systems an edge in providing customers with cost-effective aftertreatment options to meet today's stringent air quality standards.

? **Why did CAT select CleanAIR Systems?**

CleanAIR Systems is a leader in emission retrofit systems, providing technologically differentiated solutions. They have proprietary technology, flexible manufacturing enabling a high-degree of customization, and a broad product portfolio – all available at competitive prices. Many CAT dealers have had a positive experience with CleanAIR's products and technical support.

? **How are CAT and CleanAIR Systems connected?**

CAT has collaborated with CleanAIR Systems since 2003, and currently several joint development programs are underway. This particular agreement establishes CleanAIR Systems as a preferred provider of stationary aftertreatment systems to CAT dealers and customers. In addition, CAT Emissions Solutions will provide CleanAIR Systems marketing and technical support to ensure a highly reliable product.

? **How will Dealers work with CleanAIR?**

CAT Dealers will work directly with CleanAIR Systems. Inquiries, emissions specifications and pricing information can be obtained directly from CleanAIR Systems.

Frequently Asked Questions - CleanAIR Systems Agreement

? **How do Dealers find out more about CleanAIR Systems and their products?**

CleanAIR Systems has established a unique website strictly for CAT Dealers called the "CAT Dealer Web Portal". The website is password protected, with login passwords issued only to CAT Dealers. Please contact CleanAIR by phone at 800-355-5513 or send an email to: catdealer@cleanairsys.com to receive login information. You can also visit their public website at <http://www.cleanairsys.com>.

? **How do I submit a request for quotation?**

To receive a quote, please submit your application and emissions requirement information directly to CleanAIR Systems. A 'Request for Pricing' form is located on the CleanAIR Cat Dealer Portal.

? **Are Dealers required to purchase stationary aftertreatment from CleanAIR Systems?**

No, Dealers are not required to purchase stationary aftertreatment solely from CleanAIR Systems. However, as we have identified them as a long-term strategic alliance partner, we encourage you to source your application requirements from them. If they cannot meet your requirements, you are free to source products from other suppliers. Please note: CAT Emissions Solutions cannot support systems purchased from other non-preferred vendors.

? **Are CleanAIR System's emissions solutions customized to meet my specific needs?**

Products are available in a range of packaging options to fit specific application requirements. Due to CleanAIR's integrated manufacturing approach, the company is capable of offering customized products for specific applications. Depending on a number of variables such as equipment age, size, and local emissions standards, CleanAIR's technical staff will work with customers to find the most cost-effective solution.

? **Are CleanAIR System's custom-designed products more expensive?**

CleanAIR's custom products are comparable in price to other competitive products. Due to the use of high quality materials and their vertical integration, CleanAIR is able to offer a competitive price.

? **Which CleanAIR product should I use?**

Each application and situation is different. Many factors need to be discussed in order to determine which product would be the best fit for your application. Please contact the CleanAIR Systems technical sales staff with the specifics of your application.

? **Where can I order CleanAIR Systems products or replacement parts?**

CleanAIR products information is currently available via the CleanAIR – Cat Dealer Portal website. To place an order, contact CleanAIR directly.

Frequently Asked Questions - CleanAIR Systems Agreement

? **I previously purchased a Cat® SCR system, can I still order replacement parts? Who do I contact for more information?**

Caterpillar will continue to support your previously purchased Cat® SCR system. The “replacement parts” or serviceable parts will be available for the life of the system. You can order most of the parts through Morton Parts or call Charles Avery Jr., Stationary Aftertreatment Marketing Consultant.

? **Can I still order a new CAT SCR System or new CAT Oxidation Catalyst?**

No, Caterpillar will no longer sell these systems for retrofit applications. However, we will continue to support those systems sold in the past with service parts ordered as usual from Morton.

? **Does CleanAIR Systems provide technical product support?**

For free technical support, please contact via e-mail via or call toll free for assistance.

E-mail: catdealer@cleanairsys.com

Phone: 1-800-355-5513

? **What role will the Cat dealer have for sale and service of CleanAIR products?**

Since all transactions will be directed through the Cat Dealer, the Cat Dealer will provide sales, service and installation to the customer for CleanAIR products. CleanAIR Systems will provide pre and post sale support, warranty, and technical support to the Cat Dealer. Caterpillar Emissions Solutions will help with product integration or engineering specifications.

? **What Warranty is included with CleanAIR Systems products?**

Please refer to the CleanAIR Systems warranty information under the Product section of the “Cat Dealer Web Portal”.

? **Will there be sales and service training available for Dealers?**

Caterpillar and CleanAIR Systems will jointly conduct sales and service training for the following dealer personnel: Emissions Champions, Sales and Product Support Service Reps, and Technical Communicators. The locations and dates are listed below:

Western Region (Oakland) – June 25-26

Eastern Region (Baltimore) – July 14-15

Rocky Mtn. Region (Denver) – July 22-23

More opportunities for regional training can be made available as necessary.
